

8<sup>th</sup> September 2016

## Preparatory work to be undertaken at ADAS site

The former ADAS offices site, which includes ancillary outbuildings and glasshouses, continues to be the subject of repeated trespassing and vandalism despite increased security measures put in place by Telereal Trillium since buying the site in October 2015.

Whilst the site has planning approval for conversion to 52 flats, we envisage that there are alternative options that may provide a redevelopment of the site more in keeping with the location and the village.

We intend on discussing these options with the village later this autumn but in the meantime will be starting preparatory work on **Monday 19<sup>th</sup> September 2016**.

As part of our responsible approach to managing the land we own in Wye, these initial works will remove potential hazards including asbestos, glass and redundant oil tanks and will last for approximately 8 weeks.

If you have any questions regarding these works, please contact the project team via the usual channels, provided below:
